21 Subhait you frassignaien tython?	1/1 point
Functions let us use Python as a calculator.  Try again	
Functions are pieces of code that perform a unit of work.	
Functions are only used to print messages to the screen.	
Receive gradens are how we tell if our program is functioning or not.	
To Pass 80% or higher  Correct	
Right on! Python functions encapsulate a certain action, like outputting a message to the screen in the case of print().  100%	
View Feedback 2. What are keywords in Python?	1 / 1 point
We keep your highest score	
Keywords are reserved words that are used to construct instructions.	
Keywords are used to calculate mathematical operations.	
் <b>டாடி</b> Keywo <b>ndsine</b> e use to perport masses ges like "Hello World!" to the screen.	
Keywords are the words that we need to memorize to program in Python.	
√ Correct	
You got it! Using the reserved words provided by the language we can construct complex instructions that will make our scripts.
